Job Description

Main duties are as follow but not limited to:

• Test and observe electrical, electronic and mechanical components and systems using testing and measuring instruments
• Troubleshoot and repair electric motors, transformers, switchgear, generators and other electro-mechanical equipment
• Replace or recondition shafts, bearings, commutators and other components
• Wind, assemble and install various types of coils for electric motors, transformers, generators
• Perform static or dynamic balancing of armatures or rotors by welding, brazing or soldering electrical connections and by aligning and adjusting parts
• Test and repair or replace faulty wiring or components in electrical switchgear
• Test repaired motors, transformers, switchgear or other electrical apparatus to ensure proper performance
• Perform some machining to recondition or modify shafts, commutators or other parts
• Perform on-site servicing and repair.

Lawrcon Electric & Machining is an equal opportunity employer. We are committed to a diverse and inclusive workplace and do not discriminate in our hiring practices.
