Job Description

Job Description: In this role, you will be asked to perform various functions. A Carpenter is responsible for ensuring many different tasks, including but not limited to:

- Read and interpret specifications, layouts and designs
- Perform finish and trim carpentry work according to plans and specifications
- Measure, cut, and install various fixtures of materials made of wood, wood substitutes, lightweight steel and other materials
- Prepare wood structures for finishing by shaping and trimming with hand or power tools
- Fit and install trim items like doors, stairs, moulding and hardware to match irregular surfaces
- Join materials using nails, screws, staples and adhesives
- Take measurements to develop a suitable layout for a fixture
- Provide cost and quantity estimates of raw materials required for the finishing project
- Maintain, repair and renovate residences as well as commercial sites like wooden structures in mills, mines, hospitals, industrial plants and other establishments
- Implement safety and health regulations during work operations to ensure an environmentally friendly and safe structure
