Covers repairing, maintaining, calibrating, adjusting and installing industrial measuring and control instruments in pulp and paper and other manufacturing companies.

Apply by sending your Resume and Cover Letter to canadaimmigrationscs@gmail.com

Job Description

Main Duties

1. Use manufacturer’s manuals, circuit diagrams and blueprints to set test and maintenance procedures for instruments that measure and control flow, level, pressure, temperature and other process variables.

2. Inspect and test instruments and systems to diagnose faults, using pneumatic, electrical and electronic test devices and precision measuring tools.

3. Repair and adjust components such as sensors, transmitters and programmable logic controllers, or replace defective parts.

4. Calibrate components and instruments to manufacturers’ specifications.

5. Carry out scheduled preventive maintenance and complete test and maintenance reports.

6. Install control and measuring instruments on new and existing equipment and processes.

7. Consult with and advise process operators.
